-----  
Will Saint John energy adopt solar?

So this first for Saint John Energy will be an important test on the feasibility of adopting solar into our energy mix. Burchill is proving that renewable energy is not only good for the environment but makes great business sense.

Do you have solar panels outside the Saint John energy building?

We even have solar panels outside the Saint John Energy building on Simms Street, though they are used to collect data on the potential for community solar developments - work that continues. We've not yet explored utility-scale solar in this way before.

Why is Saint John energy looking for developers for a solar farm?

In this blog piece, Will shares why Saint John Energy is looking for developers for a solar farm in the city. Saint John Energy is embarking on an exciting new chapter in its journey towards a sustainable future with our call for developers interested in building a utility-scale solar farm in the city.

Does Saint John energy have a fixed price?

Through a 25-year power purchase agreement with its owners, Saint John Energy has locked in a stable, fixed price for the energy it generates. Even in its early days, that stable, fixed price is putting downward pressure on rate increases we see from our wholesaler supplier, NB Power.
