-----

To enhance the utilization of base station energy storage (BSES), this paper proposes a co-regulation method for distribution ...

The utility model relates to a microwave radar and millimeter wave communication technology field, concretely relates to three-dimensional radar system of MIMO based on 5G basic station.

This paper discusses the site optimization technology of mobile communication network, especially in the aspects of enhancing coverage and optimizing base station layout.

This paper develops a method to consider the multi-objective cooperative optimization operation of 5G communication base stations and Active Distribution Network (ADN) and constructs a ...

In this paper, based on the GNSS observation data of the 5G smart communication base station, the quality of the original GNSS ...

Given the shortcomings in 5 G base station deployment in this article, we propose a three-dimensional (3D) optimization scheme for deploying 5 G base stations at 3.5 GHz in ...

In this article, for optimizing the three-dimensional (3D) deployment of aerial-BSs for 5G mmWave networks, a classic deep reinforcement learning (DRL) network which named ...

In this paper, we will analyze 3D beamforming properties and applications in wireless communications based on the physical structure of an array antenna, addressing the 3D beam ...

Oct 12, 2022 &#183; With the development of 5G technology, a convenient and fast emer-gency

communication solution is needed when the local ground base station is unavailable for disaster.

An effective method is needed to maximize base station battery utilization and reduce operating costs. In this trend towards next-generation smart and integrated energy-communication ...

In this article, for optimizing the three-dimensional (3D) deployment of aerial-BSs for 5G mmWave networks, a classic deep ...

To enhance the utilization of base station energy storage (BSES), this paper proposes a co-regulation method for distribution network (DN) voltage control, enabling BSES ...

In this paper, based on the GNSS observation data of the 5G smart communication base station, the quality of the original GNSS observation data of the 5G smart ...
