Where to buy yarn in Gothenburg?

Although temporarily closed during my visit, Sonja Yarn is the most warmly-reviewed yarn shop in Gothenburg simply because of the knowledge and helpfulness of the staff. Pretty much anything you need yarn-related. Both a physical and online store with a strong range of yarns - I counted over 15 brands in stock at any one time.

What is textured glass fibre yarn?

A textured glass fibre yarn can consist of one or more combined filaments. Textured yarn is a fiberglass thread or yarn treated with under pressure air stream that pushes air between fibers of the thread and makes it bulky. Textured yarn is made bulky with the help of air under pressure.

What are glass fibre yarns made of?

Glass fibre yarns are made of E-glass with a thermal resistance of 600°C and HR-glass with a thermal resistance of 800°C, whereas plied glass fibre yarns are made of both E-glass with a thermal resistance of 600°C and SiO₂-glass with a thermal resistance of 1000°C. Each glass type has its own properties, hence also application areas.

What are glass fiber yarns used for?

Our glass fiber yarns are used for reinforcing the cables- HEC-Holland has a various types of glass yarns for each application depending on the needs from our customers. We have following versions to meet each individual cable requirements. Our uncoated glass fiber yarns have following strong points:

For a recent trip to Göteborg (as it's called in Swedish), I did some research into the best yarn stores in town. I had a particular Norwegian yarn brand in mind, but what I saw ...

Our ISO 9001 certified yarns are used in the field of heat protection and insulation fabrics, for the cable

industry, composites or as technical ...

ADFORS produces yarn and strand made of E glass or C glass. Its characteristics like high tensile strength, low elongation and thermal resistance enable glass fiber to be applied in different ...

AGY is a world leader in fine and extra-fine E-Glass yarns used in a wide variety of industries and applications from aerospace to industrial and from construction to automotive. Technology ...

A number of methods have been employed in recent years to produce this effect; some rely on a change to the yarn production and weaving process, some to an additional post weaving ...

We supply high-quality glass yarns to the wire and cable industry.

ADFORS produces yarn and strand made of E glass or C glass. Its characteristics like high tensile strength, low elongation and thermal ...

Looking for yarn manufacturers in Sweden? Just visit us and find yarns manufacturers, suppliers, exporters and wholesalers in Sweden. They all are yarn manufacturing companies and provide ...

Valmiera Glass produces textured yarn from 3 types of glass. It is made bulky with the help of air pressure. Commonly used for thermal and acoustic insulation.

Yarn that consists of 400 to 1,600 whole glass fiber filaments (aka continuous fiberglass threads) is a simple textile product in which the yarns are bound with sizing and the first twist and has a ...

Our ISO 9001 certified yarns are used in the field of heat protection and insulation fabrics, for the cable industry, composites or as technical sewing threads.

Glass fiber filaments are obtained by high-temperature melting of inorganic materials which are drawn through a platinum-rhodium bushing, and then rapidly cooled. Glass yarn is formed by ...

Glass fiber filaments are obtained by high-temperature melting of inorganic materials which are drawn through a platinum-rhodium bushing, and then ...
