---

In addition to mandating solar panels and energy-efficient buildings, Vienna is now heating thousands of homes with geothermal energy instead of planet-heating natural gas. It's ...

In the EU project RESTORE, researchers at TU Wien have now developed thermochemical energy storage systems that can be used to store energy almost loss-free and ...

GEOthermica Initiative, IEA Geothermal, and Geothermal IWG co-organized a workshop focusing on Underground Thermal Energy Storage (UTES) policies and strategies in ...

Its widespread use of Aquifer Thermal Energy Storage (ATES) for commercial buildings goes back to the 1990s. But high-temperature ...

GEOthermica Initiative, IEA Geothermal, and Geothermal IWG co-organized a workshop focusing on Underground Thermal Energy ...

The house exemplifies innovative efforts to increase energy efficiency, responding to the challenges of climate change and energy security facing cities around the world. Many ...

The energy isn't always placed away straightforwardly; however, the work-end result of expending Energy (pumping frequently warm) is positioned away, having a proportionate effect on ...

The Energietage 2025 convene three interlinked specialist conferences - Storage, Grids, and Data Management - under a single umbrella, positioning the event as a year-end focal point for ...

Its widespread use of Aquifer Thermal Energy Storage (ATES) for commercial buildings goes back to the 1990s. But high-temperature UTES remains in pilot mode, and the sector is now ...

Installed Electricity Storage Capacity in Austria o Electricity storage technologies are playing an increasingly important role in the synchronisation of fluctuating generation with energy demand

When combined, the U.S. and EU depleted natural gas storage by 4.3 trillion cubic feet (TCF) during the 2024-2025 heating season compared to 2.9 TCF during the prior one.

In this issue, we present several pioneering Austrian projects on heat storage technologies and report on the involvement of Austrian experts in the International Energy Agency's technology ...
