-----

Vietnam's energy storage race is like a game of Tetris: fast-paced, occasionally chaotic, but wildly rewarding if you slot the pieces right. With projects like GoodWe's Haiphong plant and VinES's ...

The Vietnamese government has approved two new solar power plants and two battery energy storage systems (BESS) in the Nam Dinh and Thai Binh provinces. These ...

Solar & Storage Live Vietnam 2025 stands as a powerful testament to the nation's commitment to clean energy innovation.

Centralized photovoltaic (PV) projects paired with energy storage systems (like battery energy storage, or BESS) are at the heart of this transformation, driven by ambitious ...

In the PDMP8, Vietnam's government planned to develop two electricity storage types: pump hydro and batteries. BESS will be applied to the power system when the price is ...

A strategic analysis of Vietnam's energy future: why Battery Energy Storage Systems (BESS) will decide enterprise competitiveness by 2026, and how SolarBK is shaping ...

TotalEnergies launched its first solar-plus-battery project in Vietnam at a Dong Nai lubricants plant. The system supplies 60% of the facility's electricity needs and cuts 300 tons ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for

solar power, introducing location-based pricing and, for the first time, ...

The BESS project aims to demonstrate the commercial viability of battery energy storage in Vietnam and showcase the practical benefits of renewable energy, including its reliability and ...

The Vietnamese government has approved two new solar power plants and two battery energy storage systems (BESS) in the Nam ...

The BESS market is still in its early stages but it has been growing rapidly, mainly in developed countries. Key factors behind this growth are the fall in battery prices, improved ...
