This is the first project of its kind in the Middle East and North Africa to produce green hydrogen using solar energy, storing it, and converting it back into electrical energy, ...

Cummins leadership unveiling the zero emissions Battery Energy Storage System (BESS) in Dubai.

Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

Compact and light compared with traditional alternatives, these cutting-edge energy storage systems are ideal for applications with a high energy ...

The thermal energy storage battery storage project uses molten salt thermal storage storage technology. The project was announced in 2018 and will be commissioned in ...

Compact and light compared with traditional alternatives, these cutting-edge energy storage systems are ideal for applications with a high energy demand and variable load profiles, ...

Dubai's summer temperatures regularly hit 45°C, yet its skyscrapers stay frosty enough to hang icicles. How? The answer lies in thermal energy storage (TES) systems that ...

Dubai's new CSP plant is designed to collect heat from the sun and store it in molten salt or convert it directly into electricity via a steam generator set - an ideal solution for ...

Renewable energy storage systems are technologies that store energy generated from renewable sources (like solar or wind) for later use, ensuring a steady energy supply ...
