How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

What are the different types of energy transformation in Equatorial Guinea?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity.

Why is energy in Equatorial Guinea declining?

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data.

How much oil does Equatorial Guinea produce a day?

In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes.

Find a summarized energy profile for Equatorial Guinea (Atlas of Africa Energy Sources). Find an overview of the electrification investment scenarios (2025 and 2030) for Equatorial Guinea on ...

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment ...

What are the outdoor power supplies in Equatorial Guinea

Source: <https://drakoulis.eu/Fri-09-May-2025-34667.html>

Website: <https://drakoulis.eu>

Equatorial Guinea uses power plugs and sockets of Type C and Type E, with a standard voltage of 220 V and a frequency of 50 Hz. If your devices are compatible with these specifications, ...

Energy production includes any fossil fuels drilled and mined, which can be burned to produce electricity or used as fuels, as well as energy produced by nuclear fission and renewable ...

Hardware includes generation units like diesel generators, hydroelectric turbines, and increasingly, renewable sources such as solar panels. Transmission infrastructure ...

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Equatorial Guinea s on this Equatorial Guinea Data Portal.

It supports 2.5kWh battery expansion packs and can support up to 6 power packs, reaching 17.5kWH, to provide a stable power supply for various household appliances.

The voltage in Equatorial Guinea is 220 volts, and the frequency is 50 Hz. Travelers visiting Equatorial Guinea should bring a power adapter that supports type C and type E sockets.
