In several C++ examples I see a use of the type `size_t` where I would have used a simple `int`. What's the difference, and why `size_t` should be better?

The OP was asking "`Array.size ()` vs `Array.length`". From the previous discussions, it was make clear, that the "size" Function is not part of standard JavaScript but implemented ...

```
typedef size_t intc; // (instead of unsigned int) typedef ssize_t uintc; // (instead of int) Because strlen, string, vector... all use size_t, so I usually use size_t. And I only use ssize_t when it may ...
```

If the size of the `int` is that important one can use `int16_t`, `int32_t` and `int64_t` (need the `iostream` include for that if I remember correctly). What's nice about this that `int64_t` should not have ...

The approach basically builds on other work where people experimentally identified the size of primitives and typical Java objects and then apply that knowledge to a ...

What is the command to find the size of all the databases? I am able to find the size of a specific database by using following command: `select ...`

I'm trying to write a script that will calculate a directory size and if the size is less than 10GB, and greater then 2GB do some action. Where do I need to mention my folder name? `# 10GB SIZE="`

As you know, matlab deals mainly with matrices. So, the size function gives you the dimension of a matrix depending on how you use it. For example: 1. If you say `size(A)`, it will give you a ...

What is the difference between `.size()` and `.length` ? Is `.size()` only for arraylists and `.length` only for arrays?

What is the size of the solar inverter 225
