How does the port of Marseille-Fos use electricity?

The Port of Marseille-Fos buys electricity with renewable certificates of origin. In order to further improve the overall energy mix for OPS connections, it is planned to equip the port buildings' roofs with photovoltaics in order to reach the level of power required for the simultaneous connection of all the vessels.

Does the port of Marseille-Fos provide onshore power supply (Ops)?

The Port of Marseille-Fos provides Onshore Power Supply (OPS) for ships at berth and constantly looks at expanding its OPS connections network.

Is Marseille Fos a good port for Ops deployment?

With its high-voltage OPS coverage across multiple terminals and its EUR169M investment by 2028, Marseille Fos ranks among the leading European ports for OPS deployment and a reference in scalable decarbonization infrastructure globally.

What is the port of Marseille-Fos strategic project 2019-2023?

The Port of Marseille-Fos is committed to continue the effort in the framework of its Strategic Project 2019-2023, that aims to reduce the environmental nuisances and impacts in the whole Marseille Basin. As part of the project, new OPS connection points will be deployed to serve more terminals and shipping companies.

In Marseille, the main concern of those protesting against the proliferation of data centers is about energy, as illustrated by the case of ...

Energy Independence: A home energy storage system allows homeowners to store solar energy generated from renewable sources such as solar panels, allowing homeowners to go off-grid ...

Already for many years, the port was providing low voltage (400 volts in 50 Hz) OPS but during the last 3

years, high voltage (11,000 volts and 50 Hz) OPS is also available for the mixed ...

As industries in Marseille increasingly prioritize energy resilience, Battery Energy Storage Systems (BESS) have emerged as a game-changer for uninterruptible power supply.

With its high-voltage OPS coverage across multiple terminals and its EUR169M investment by 2028, Marseille Fos ranks among the leading European ports for OPS deployment and a reference ...

This project, the first of its kind for the two companies, reflects their shared desire to accelerate the development of energy storage solutions. It also marks a strong commitment ...

Containerized energy storage solutions now account for approximately 45% of all new commercial and industrial storage deployments worldwide. North America leads with 42% market share, ...

This project, the first of its kind for the two companies, reflects their shared desire to accelerate the development of energy storage ...

In Marseille, the main concern of those protesting against the proliferation of data centers is about energy, as illustrated by the case of the failed electrification of cruise ships.

The Port of Marseille and the most active shipping companies in Marseille committed themselves, by signing a Blue Charter, to respecting rules that are much more ...

With its high-voltage OPS coverage across multiple terminals and its EUR169M investment by 2028, Marseille Fos ranks among the leading European ...

The Port of Marseille and the most active shipping companies in Marseille committed themselves, by signing a Blue Charter, to ...

It ensures maximum energy efficiency by optimizing solar power generation, energy storage, and usage. The system guarantees a reliable power supply during peak times and nighttime, ...
