Where is PSEG Nuclear Power Plant located?

The entire PSEG nuclear complex as seen from the Delaware Bay. The Salem Nuclear Power Plant is a two-unit pressurized water reactor nuclear power plant located in Lower Alloways Creek Township, in Salem County, New Jersey, United States. It is owned by PSEG Nuclear LLC of the Public Service Enterprise Group and Constellation Energy.

Where can I find information about the SRE nuclear power plant?

Additional information can be found on the U.S. Dept. of Energy's website and the SRE Wikipedia page. The Vallecitos Nuclear Power Plant near Pleasanton, Calif., was jointly built by PG&E and General Electric Company and operated from 1957 to 1967. This was a small, 30 MW power plant.

How many nuclear power plants are there in the United States?

Work resumed in 2007, and the reactor came online in 2016. With 95,881 MW of nuclear power capacity at 93 operating commercial reactors, the United States has more nuclear capacity than any other country. Nuclear power plants produce nearly 20% of the country's electricity.

Which data center will be powered by a nuclear power plant?

In March, Amazon Web Services bought a data center campus from Talen Energy that will be powered by the Susquehanna nuclear plant, also in Pennsylvania, in a first-of-its-kind deal. Oracle recently said it is designing a data center that will be powered by three small nuclear reactors.

The Salem Nuclear Power Plant is a two-unit pressurized water reactor nuclear power plant located in Lower Alloways Creek Township, in Salem County, New Jersey, United States. It is ...

Unit One is a 1138 MWe pressurized water reactor supplied by Westinghouse. It went online on May 7, 1985, and is licensed to operate through November 2, 2024. [18]
