How many 5G stations are there in Brazil?

The National Telecommunications Agency (Anatel) has approved the licensing and activation of 5G technology stations in an additional 395 municipalities as of Monday, March 18. This brings the total number of municipalities with 5G coverage to 3,678, covering approximately 181.3 million Brazilians, or roughly 85 percent of the population.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

Where can I find a list of authorized municipalities and certified 5G devices?

The full list of authorized municipalities and certified 5G devices is available on Anatel's data panel. Click here to read the official announcement and view the 194 municipalities which providers will be able to request Anatel to license and activate 5G stations in the 3.5 GHz band.
