---

Ever wonder what makes modern wind turbines spin smarter, not harder? Let's pull back the curtain on KK Wind Solutions, the silent partner behind 30% of global offshore wind installations.

Multiple uses: The wind turbine generator has high wind energy utilization and high efficiency performance, suitable for home monitoring, RVs, boats, pavilions, cabins, ships and other ...

KK Wind Solutions, a global leader in power, control, and cooling solutions for renewables, will deliver key technologies for a green hydrogen plant concept being developed ...

Providing reliable power to yaw motors and wind turbines systems during grid outages. Developed for high flexibility and modularity, our Yaw Backup System enables tailoring the voltage, power ...

Wind power generation is defined as the conversion of wind energy into electrical energy using wind turbines, often organized in groups to form wind farms, which provides a clean and ...

KK Wind Solutions, a EUR 1 billion company owned by A.P. Moller Holding, is leveraging its experience as a leader in power converter systems for renewables and ...

One of the main reasons we use KK thyristors in wind power systems is their ability to handle high currents and voltages. Wind turbines can generate a ...

KK Wind Solutions, a provider of wind energy technology, is launching a new U.S. regional division under the leadership of Kim Wichmann-Hansen, previously the company's ...

KK Wind Solutions, the 1 billion euro wind energy giant owned by A.P. Moller Holding, has officially inaugurated Asia's largest wind power generation facility, its website said.

We introduce the KK SCADA, a new advanced SCADA system. We launch the industry's first SCADA (Supervisory Control and Data Acquisition) system. We launch a new control system, ...

One of the main reasons we use KK thyristors in wind power systems is their ability to handle high currents and voltages. Wind turbines can generate a significant amount of power, and the KK ...
