-----

This development marks the company's first publicly confirmed effort in solid-state technology and may pave the way for in-house battery production, reducing its dependence on major suppliers...

Analysts note that solar-powered remote charging stations using containers will enjoy one of the highest CAGRs due to rising rural use of EVs and disaster relief applications.

This week, Xiaomi filed a patent for a next-generation solid-state battery that could dramatically boost range and charging speed. According to reports, the battery design may ...

According to a report from CarNewsChina, the automaker has entered the race to develop solid-state batteries.

With Xiaomi entering the portable energy storage product market, the industry is buzzing. This article targets tech-savvy consumers, outdoor enthusiasts, and businesses seeking reliable ...

A key challenge in the solar container market is the unstable power supply and battery limitations, which affect system efficiency and reliability. Since solar containers rely on sunlight, energy ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

A key challenge in the solar container market is the unstable power supply and battery limitations, which affect system efficiency and reliability. Since ...

In June 2025, Xiaomi Motors announced a solid-state battery patent: the layered electrode design reduces the volume efficiency of the battery pack to 77.8%, the CLTC range ...
